

Patrick Richards

Senior Software Engineer | Full Stack Web Developer

585-509-0766 | pat@patrickrichards.com | Webster, NY | linkedin.com/in/patrickrichards

Professional Overview

Senior Software Engineer and Technical Architect with extensive experience designing, developing, and deploying scalable web applications, enterprise software systems, and high-performance databases across the full Microsoft .NET stack. Proven track record modernizing legacy architectures, engineering RESTful APIs, and implementing robust backend data solutions using C#, ASP.NET, SQL Server, and Azure. Accomplished in technical leadership, full lifecycle SDLC execution, and architecting mission-critical platforms across e-commerce, healthcare, education, engineering, manufacturing automation, and government sectors.

Skills & Competencies

Backend & Languages

C#, .NET Core / ASP.NET Core, .NET Framework, Microsoft SQL Server, LINQ, Entity Framework Core, RESTful APIs

Frontend & Web

JavaScript, TypeScript, HTML5, CSS3, SCSS, Bootstrap, jQuery, XML, JSON, Responsive Web Design, DNN, 2sxc

Database & Cloud

SQL Server, T-SQL, Stored Procedures, Schema Design, Query Optimization, Microsoft Azure, IIS, Windows Server

Architecture & CMS

DNN (DotNetNuke) CMS, 2sxc Dynamic Content, E-Commerce Systems, ERP Integration

Tools & Methodologies

Git, GitHub, Agile, Object-Oriented Design, Systems Analysis, Business Continuity, Client Discovery

Artificial Intelligence

Claude, Gemini, ChatGPT, Codex, Pursuing Google AI Professional and Anthropic Academy Certificates

Certifications & Courses

Google AI Professional

Microsoft Introduction to ASP.Net Core Framework

Anthropic Academy: Claude 101, Claude Code 101, Claude Platform 101, Claude Code in Action

Professional Experience

Full Stack Web Developer

nvisionative, Inc. – Remote

July 2024 – April 2026

Technical Leadership & Full-Stack Redesign: Architected and led the development team in successfully redesigning and launching Thompson Health's 800+ page public enterprise portal, engineering custom C# backend modules, custom DNN themes aligned with UPMC branding standards, and structured dynamic data models using 2sxc. Proactively engaged with clients, identifying opportunities for continued development and maintenance, leading to ongoing revenue stream and increased customer satisfaction.

Enterprise & Government Solutions: Engineered secure intranet and public-facing .NET web applications for high profile clients including Erdman Anthony and the U.S. Department of Veterans Affairs, while maintaining and scaling 10+ client production environments.

Business Continuity & Infrastructure Migration: Served as primary technical continuity lead throughout the corporate acquisition of OS-Cubed, safeguarding critical client SLAs, managing DNS and cloud infrastructure, and ensuring 99.9%+ uptime across production web servers.

Manager of Development Services

OS-Cubed, Inc. – Rochester, NY

January 2008 – July 2024

Engineering Leadership & SDLC Management: Directed engineering teams (1–5 developers) across the complete SDLC, delivering custom software, database architectures, and enterprise web solutions spanning healthcare, manufacturing, and distribution.

High-Performance E-Commerce & ERP Integration: Architected the backend and database for Classic Automation's e-commerce platform cataloging 1,000,000+ products. Engineered high-throughput SQL Server stored procedures and front-loaded search mechanisms reducing query response times to <500ms, with automated near-real-time inventory and billing synchronization to Acumatica ERP.

Application Architecture & API Development: Programmed core C# and .NET server-side business logic, Web APIs, and dynamic database integrations adhering to strict performance, security, and scalability benchmarks.

Database & Server Infrastructure: Provisioned, secured, and administered co-located Windows Server clusters, IIS environments, DNS, and Microsoft Azure deployments. Designed complex relational schemas, views, and optimized indexing strategies in SQL Server.

Software Developer

OS-Cubed, Inc. – Rochester, NY

November 2005 – December 2007

Full-Stack Web Development: Engineered custom module components, database models, and dynamic interfaces as a core founding developer on the OS-Cubed application team.

Public Safety Application: Augmented the development and deployment of a mission-critical weekly tracking and reporting system for the Rochester Police Department utilizing Microsoft Office automation.

Software Developer

Aztek Computer Solutions, Inc. – Rochester, NY

November 2004 – October 2005

Software Development and Reporting: Developed VB6 and Crystal Reports weekly reporting system used by Corning Glass World Kitchen for sales tracking.

Additional Software Engineering Experience

Prior software engineering and systems roles include Senior IS Specialist at EDCO, Inc. (architected secure records retrieval systems managing 100,000+ medical records), Software Developer at Xerox, Inc. (developed Bill of Materials engineering applications), and Software Developer at Paychex, Inc. (built enterprise data reporting and high-volume print generation systems).

Education

Bachelor of Science in Computer Science

Rochester Institute of Technology (RIT) – Rochester, NY

Focus: Software Engineering, Computer Engineering Technology, and Advanced Data Structures

Bachelor of Arts in Pastoral Ministry and Bible

Baptist Bible College – Springfield, MO

Focus: Pastoral Ministry, Bible, Greek
